

Built for TPN. Designed for Life.

CURLIN[®] 8000

Ambulatory Infusion Pump

BY MOOG[®]

Built for the unique demands of long-term, high-volume TPN therapy, the CURLIN 8000 delivers the reliability and confidence clinicians trust and patients rely on, across any care environment and wherever life takes them.

Purpose-built for long-term TPN therapy

Building on the proven reliability of the CURLIN 6000, the CURLIN 8000 provides consistent, uninterrupted nutritional support for patients who depend on precise TPN delivery.

Engineered for performance

An innovative curvilinear mechanism delivers optimal flow resolution, continuity, and accuracy over extended infusions, ensuring precise nutrition administration day after day.

Designed for real-world use

A sturdy, impact-resistant design ensures dependable operation whether patients are at home, on the move, or transitioning between care settings.

Mobility without compromise

Multiple power options, including rechargeable Lithium-Ion, C-cell, and AC, support patient mobility and independence while maintaining consistent nutrition delivery.

Empowering patients & supporting clinicians

On-board infusion history, intuitive on-screen guidance, and a dedicated help button with contextual help tools enable patients and caregivers to resolve common issues, reducing unnecessary clinical calls.

If you ever have questions or concerns, call our clinical support team. This support line is available 24 hours per day, 7 days per week for anyone who needs assistance with any of our pumps.
